MAXIMUM TRANS HYDRO ATF-II, 1L

Hydraulic oil with good anti-wear properties, excellent filterability, effective corrosion protection and good pump ability designed for use in hydraulic systems. Made on the basis of distillate components. Multifunctional composition of additives improve frictional, anticorrosive and anti-wear properties of oil.

APPLICATIONS

Various industrial hydraulic systems. Hydraulic systems of machine tools. Hydraulic pumps of different manufacturers. Piston, gear, axial-piston and vane pumps with requirements of manufacturers. Hydraulic systems special construction, agricultural and other equipments where viscosity class of ISO 32 is required.
